Materiale riciclabile
Recyclable material

La base cuneiforme della valigetta e la presenza dell'asola universale permettono una stabile esposizione su banco o in sospensione. L'utilizzo di formati preesistenti consente la personalizzazione interna ad una frazione del costo dell'intero stampo. Seguendo la sagoma del prodotto ed utilizzando materiali ad elevata trasparenza e brillantezza se ne valorizza il contenuto.

CUNEO

**Valigette termoformate
cuneiformi**
**Wedge-shaped Folding
Blister**

The wedge-shaped base and the universal hanging euroslot allow a steady bench or hanging display. The use of pre-existing moulds allows an inner customizing at a fraction of the full tooling costs. Following the product shape and using high transparency and brightness materials, a better enhancement of the contents is reached.
